HE FAVORS REFORMS

THE CZAR SPEAKS TO THE PEOPLE

A Distinct Improvement in Russian Internal Affairs Brought About by the Emperor.

St. Petersburg, Feb. 13th.—"I am not opposed to a Zemsky labor. On the contrary, I believe it necessary." In these words the Czar personally declared himself in favor of a land congress. He expressed the conviction that the time had come to give the people a voice in the Government. The Emperor spoke to Count Leon Tolstoi, son of the famous author. There is now a distinct improvement in the situation throughout the Empire. Anticipated trouble among the St. Petersburg working men is not realized.

Making Good Time.
Bulletin Special.

Winnipeg, Feb. 13th.—Unprecedented progress has been made in the bonspiel since the commencement all past records in the number of games played in the same time have been broken. Only eleven rinks are left in the Grand Challenge. Willoughby of Regina being among them.

A TRAGIC INCIDENT

AT THE WINNIPEG BONSPIEL.

The Wife of an American Curler Dies Suddenly in the Winnipeg Hospital.

Winnipeg, Feb. 13th.—A tragic incident in the bonspiel was the sudden death on the operating table at the hospital of Mrs. Mitchell, the wife of a Bowesmont, N.D., skip. Mrs. Mitchell accompanied her husband to Winnipeg, and was found to be seriously ill. Local physicians advised her to go to the hospital, where death occurred on Sunday. The American rinks have pulled out of the bonspiel and left for home. The Association met them at the train with wreaths and a resolution of condolence. Special reference was made to the demise in the annual sermon to curlers at St. Andrew's Church.

Valuable Church Burned.

Bulletin Special.
St. Marys, Feb. 13th.—Fire on Sunday destroyed Knox Church including the new pipe organ. The loss is \$20,000 and insurance, \$7,600. This is the second time the church has been burnt.

WESTERN ITEMS.

—Mr. Postill, of Red Deer, was chosen as standard bearer for the local elections at the Co-operative convention at Lacombe on Monday last.

—Ft. Saskatchewan Reporter:—That the contract for the lumber required for the temporary C. N. R. bridge at Fort Saskatchewan has been let to John Walker, of Edmonton, is sufficient rejoinder to the rumor current last week that the C. N. R. were side-tracking the Fort by going 3 miles south.

—Industrial Canada:—The Peterborough Canoe Company shipped to Edmonton last month the hull of a steam yacht 66 feet long, which was built entirely of white-oak. Every piece was carefully numbered so that the yacht could be set up without any trouble on its arrival. From Edmonton it will be carried by sleighs hundreds of miles inland to its ultimate destination.

—Red Deer News:—Upon receipt of a communication from the Calgary Board of Trade re the appointment of the provisional capital for Alberta, a special meeting of the Red Deer Board was called upon Saturday evening last to consider the question. After deliberation, it was decided to assent to their request and co-operate with Calgary to this extent, with the distinct understanding, however, that Red Deer will be in the field as a claimant for the appointment when it comes to a final decision.

—Strathcona Chronicle:—Last night shortly after midnight Mr. C. J. Sommers reported to the chief of police that a man was freezing to death near the immigration hall. It was found that the man was our well known painter McMahon who had returned from the Edmonton hospital in an intoxicated condition. He was undressed at the fire hall, rolled in blankets and sent to the Edmonton Hospital. At times of going to press we learn that he is not frozen very seriously and no fears are entertained for his recovery.

—Fort Saskatchewan Reporter:—It appears as if there is going to be quite a nice little family quarrel as to which city is to be the capital of the new province. The worthy burghers of Calgary have already sent a deputation to Ottawa and we have received a long letter from the Calgary Board of Trade suggesting that some small place such as Banff, should be a Provisional Capital, until the local legislaure meets and fixes the permanent place. They seem terribly afraid that some town like Edmonton will steal a march on them. For our own part we would suggest Fort Saskatchewan as a Provisional Capital, for if the first legislative meeting at Banff, we feel sure that nearly all of the members would get into hot water.

ROSS BROTHERS LIMITED

ARE THE SOLE AGENTS
IN EDMONTON FOR THE

MONARCH RANGE...

There is no question as to what this Range can do or its durability, as thousands and thousands of them are in use on this continent, and so far as we have been able to learn, no fault has yet been found with them.

The main body of this Range is built up of sheet steel, and all the other parts that require to be cast are malleable iron. The top is ground to a bright steel finish, and is so heavy that, no matter how long or how hot you heat it, you cannot make it warp or get out of shape.

You will notice that the oven has a drop door, and the above cut illustrates the strength of this door, as any man can stand on it when it is open without staining it in the least. This will give some idea of the strength of the Stove, as all its parts are as strong as this cut of the oven door open with the salesman standing on it would convey to you.

It is a wonderful baker, a very quick heater, and its water front is so constructed that it will heat water nearly twice as quick and on a much less quantity of fuel than any other Range now on the market.

The purchaser of a MONARCH RANGE insures a satisfaction that cannot be measured in dollars and cents, for at the end of ten years' use it will operate easily and be just as good as when first started.

Remember the MONARCH when you want to purchase a Range.

Ross Bros. Ltd.

PRICES OF GRAIN AND HOGS.

Editor Bulletin:—

Like most farmers I have been interested in reading the correspondence of late in your columns re "farmers prices," and as these prices are of vital importance to the whole community I venture to ask space in your valuable paper for further remarks on this subject.

I say of vital importance to the whole community, because it will be generally admitted that upon the prosperity of the farmers depends in a great measure, if not entirely, the progress of this country. We have been waiting for some explanation from the out-buying interests but have so far received no word from that quarter. We are not altogether surprised at this, as we can readily believe that they think "silence is golden." With oats in Winnipeg at least 20 per cent. higher than in Edmonton, and the famed manufacturer in Winnipeg selling in Edmonton at the same price as the home product, we can understand how difficult it would be for them to explain how they are making only a "fair profit." We think that they would have a harder job even than our friends of the wheat milling interest; and how well they succeeded we all know. "Another farmer's" letter showed that up very well. Just another case of charging the producer and the consumer the freight of stuff that is not transported.

That better prices should be paid for both wheat and oats we farmers are certain, but with the buyers it is apparently a case of "don't have to." This is what we farmers are "up against" at present.

I would like to ask, Mr. Editor, why we of the N. W. Territories have not as favorable legislation as Manitoba. In that province grain mills are not allowed to charge more than 12 1/2 cents per bushel for grinding farmers' wheat or to take more than one sixth or 16 2/3 per cent as toll. Why should we be charged from 25 per cent up? Of what benefit to the community is our boasted advantage of cheap fuel for manufacturing purposes? Let the farmers press this point upon their representatives in parliament. And while the wheat grower is being attacked let them see that the oat

grower is being attacked. Another grain writer, who is suffering tremendously, is in the market for hog products. We farmers have been exhorting in the past remedy the cheap grain grievance by feeding the same to a good class of hogs. Much time, thought and money have been spent by the farmers in acting upon this advice. Now what do we find? We have the hogs and good cubs, but where is our market? Our hogs can be sold at a loss or stay in the pen, while the market has been supplied by Chicago pork sent here by the carload, costing the packers there a far higher price than we can get, and then two cents per lb. duty and the freight from Chicago here. Thousands of dollars lost to this community! Surely this is a question worthy of consideration by the business men of Edmonton and the neighborhood, and if they are not able to cope with it, it would surely not be amiss to get the assistance of the Government.

Steel, too, has been so low as to be most unsalable. Some say that the cause is monopoly. Let the farmers think and act accordingly. Your correspondent "Farmer" advised organization. I believe that this is one remedy. Let the farmer have the same price for his own product rather than the other fellow.

I notice in your columns that the town of St. Albert has passed a by-law to build a grit mill and Edmonton to own the public utilities of lighting, water works, etc. (Why not go a step further and build flour and oatmeal mills and packing houses? Surely with the profits some of these concerns are making at present Edmonton could soon make her taxes very light, and at the same time could command sufficient capital and skill to prevent such loss to the community as I have referred to above.

Thanking you in advance for the space accorded, I am yours sincerely,

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$750 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500 by 1500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$500.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T.—excepting the Yukon Territory, Placer mining claims are generally 100 feet square. Entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T.—excepting the Yukon Territory, dredging claims may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior. The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles, or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party acquiring claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller. No free miner shall receive a grant

of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent; is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz, and gold, and provides for the withdrawal of unoccupied land for agricultural and building purposes.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 400 acres. Should the prospectors discover oil in paying quantities, and satisfactorily establish such discovery on an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of Interior, Ottawa, September, 1903.

JAMES A. SMART
Deputy Minister of the Interior,

The Treaties Ratified.

Bulletin Special.

Washington, Feb. 13.—The Senate on Saturday ratified arbitration treaties between the United States and eight European countries.

Passenger Coach Burned.

Bulletin Special.

Peterboro, Feb. 13th.—The passenger coach on the C.P.R. midnight west bound train caught fire last night near here the car was detached and was utterly destroyed by the flames.

Woman Arrested for Murder.

Bulletin Special.

Windsor, Feb. 13th.—Peter Barron died in this city under suspicious circumstances. His daughter-in-law is now arrested on a suspicion of having poisoned him.

Ottawa's Won Cup Game.

Bulletin Special.

Montreal, Feb. 13.—In the Stanley cup game Ottawa defeated the Wanderers, 4 to 2.

Divisional Point at Red Deer.

Bulletin Special.

Red Deer, Feb. 13th.—The C.P.R. have decided to make Red Deer a divisional point and turning point on the C. & E. railway. The plans of the yards, roundhouse, etc. are in the hands of the town council, and a by-law will be placed before the ratepayers, for the purchase of the land for the company as soon as possible so that the work may be commenced in the spring. This is another sign of the progress of the town.

Telegraphic Briefs.

Collingwood, Feb. 11th.—Another big fire occurred here last night, the rear of Stephen & Co's large wholesale building being completely gutted. The loss is \$37,000 and the insurance two thirds of the amount.

Brandon, Feb. 11.—The Manitoba Dragoons held a brilliant ball last evening, the Lieutenant Governor and many distinguished guests being present.

Montreal, Feb. 11th.—John Polan and Amade Daunais two workmen were killed by falling material in the railway shops here.

Toronto, Feb. 11th.—The first formal meeting of the Whitney cabinet was held yesterday.

THE BONSPIEL.

In winning eight games while losing only two, the rinks of Spafford of Calgary wins the Grand Aggregate in Edmonton's third annual bonspiel.

The bonspiel which started last Tuesday has been very successful in every way. All the events have been closely contested and the trophies won strictly on the merits of the opposing rinks.

There were rinks present from several towns down the line as far as Calgary and also from Ft. Saskatchewan and Poplar Lake of this district.

Calgary carries away two of the trophies while Edmonton retains the others.

In all there were six events, there being but three open ones however from which the Grand Aggregate is reckoned.

The events are given below with the name of the skip of the winning rink:—

Grand Challenge, Emery, Edmonton
McDougall Trophy, Galbraith, Edmonton.

Emery Trophy, Spafford, Calgary.
Edmonton vs. All others, Edmonton
Gallagher Cup, Spafford, Calgary.
Consolation, Rae, Edmonton.

Edmonton having won the fourth event by a score of 86 to 75 will play off the remaining games this week. The rinks of Cushing, Ibbotson, Laufer and Rae alone remain in this event.

The rink of Spafford of Calgary was undoubtedly one of the strongest that ever played in Edmonton as their score indicates. Others that might be mentioned very good were those of Red Deer and Ft. Saskatchewan, both of them winning the majority of their games and only falling down at the very last.

CONSTABLE INSANE.

Constable Peasey who brought a lunatic from Chippewyan, Alberta some time ago suddenly went violently insane at Lac La Poudre when on his way back to the north. He reached Victoria this morning being brought back to the Fort.

The secret of ironing success is found in every package of Celluloid Starch. From a few drops of this starch, you can do all your ironing, and do it beautifully, too, with the aid of Celluloid Starch. Don't make a failure of your ironing any more. Just ask your grocer for Celluloid Starch.

Celluloid Starch

Never Sticks. Requires no Cooking

The Celluloid Starch Works Limited, Montreal, Canada

Monkey Brand Soap removes all stains, rust, dirt or tar from—just wash with it.

REMAINS IDENTIFIED

AS THOSE OF LONG LOST MAN.

Police Returned Saturday from Investigating a Ghastly Find West of Leduc.

Constables Parker and Derby of the R.N.W.M.P., returned on Saturday from the Strawberry creek settlement west of Leduc where they went to investigate the reported find of human bones and clothing supposed to be the remains of a man named Moller who wandered from his home on the creek nearly a year since.

Dr. Little of Leduc, coroner, was present and held an inquest.

The jury was composed of Messrs. Robertson, Dunlop, McDougall, Ales Bentley and Van Alstyne. Three witnesses were examined as to the identity of the remains. They were Messrs. J. A. Stokke, Jas. Smith and A. M. Munson, all residing near Telfordville. The jury brought in a verdict to the effect that the body was that of George Moller and the cause of death unknown.

Moller with his wife and family came from Anacosta, Mo., a year ago, in November and settled on a homestead near Telfordville, 35 miles west of Leduc. On April 13th last he disappeared from his home and though thorough searches were made by the police and by parties of neighbors no trace of him was found until last week.

Deceased was 41 years of age. He had been lost on several previous occasions and was supposed to have been temporarily insane when he wandered away.

Mrs. Moller and family are at present in Anacosta but she intends returning soon to complete her homestead duties.

CALGARY STREET RAILWAY CO.

Calgary Herald.—The following interesting advertisement appears in the weekly Herald:

Notice: It is hereby given that a meeting of the Shareholders of the Calgary Street Railway Company will be held in the offices of Louhead & Bennett, Eight Avenue, Calgary, N.W., on Thursday, February 23, 1905, at 2.30 o'clock in the afternoon, for the purpose of electing Directors.

Calgary, 3rd day of February, 1905.

John Lineham,
William D. Lineham,
George K. Leeson.

Provisional Directors.

This refers to a company that was organized some twelve or fifteen years ago by the Linehams and Leeson. Just what the purpose is in reviving the subject is uncertain, but it is attracting more or less attention in view of recent statements that Mackenzie & Mann were negotiating for a street railway franchise in Calgary.

EDMONTON'S PROSPECTS GOOD.

It is reported that the city council is in receipt of a private telegram from F. Oliver M. P., to the effect that the prospects are bright for Edmonton becoming the temporary capital.

CURLING.

The bonspiel being now over the regular club games will be resumed. The draw for tonight is:—

Rae vs. Fraser.
Secord vs. Irwin.
Kinnaird vs. Lander.
Tuesday, 14th 1905.
Harrison vs. Manuel.
McDonald vs. Galbraith.
Clendenin vs. Mathers.

FOUND GREUSOME
REMAINS.

Leduc "Enterprise."—On Tuesday the 7th inst., as Mr. Stokky of Straw berry Creek was crossing over the stream, his attention was drawn to some tattered cloth strewn along a coyotes trail. Becoming curious he followed the tracks for a short distance when he came suddenly upon a little heap consisting of clothing and bones, and upon inspecting the same arrived at the conclusion they were human testimonials. He therefore secured a sack and conveyed the finding to his own premises, notifying at once the coroner Dr. Little of Leduc—the doctor immediately notified the Edmonton police. The coroner and three officers of the law left town today to investigate case. The skeleton found is believed to be what is left of the remains of George Moller, who last April, as a settler of that district mysteriously disappeared from his home, without a coat or hat, and carrying a gun. His disappearance caused much comment for a long time, and the supposed widow who is now residing in Little Sam's country offered liberal rewards for the finding of her husband whether dead or alive. The discovery of the remains were about two miles and a half from the Moller home. Mrs. Moller has been wired the particulars. The bones were supposed to have been uncovered by prairie wolves.

MARTINS.

Bulletin Correspondence.

Fun is the pass-word at Martins. Dances and basket socials are the order of the day in these parts. Business is steadily increasing although the cold weather has been a disadvantage to our businessmen. The surrounding country is fast settling up. Homesteaders have to get on their claims unless they wish to lose them. Mr. Bishop and family have moved into our community and we extend to them a hearty welcome.

There have been two babies so far in these parts of late. One in the Longbridge School District and the other in the Adams School District. Each was a natural success and the young people enjoyed themselves to their hearts content. Such social events do much to make people more neighborly and more content especially when the thermometer registers degrees that send cold chills through you.

We expect many settlers to come in during the spring. The homestead land is nearly all occupied but there is considerable speculation land can be bought at reasonable figures. The G.T.P. comes within eight miles of Martins. The C.N.R. branch will run through it. Hence we expect a great future.

A MAN WANTED

If you want a good thing that will establish you in business, and can satisfy you as you are reliable, we will start you at once.

Queen City MADE-TO CLOTHING CO.
TORONTO, ONT.

The Canadian Northwest
Homestead Regulations

Any even numbered section of Dominion Lands in Manitoba or the Northwest Territories, excepting sections 22, which has not been homesteaded, or reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age to the extent of one quarter section, of 160 acres, more or less.

ENTRY.—Entry may be made per the district in which the land to be taken is situated, or, if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him. A fee of \$10.00 is charged for a homestead entry.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required by the provisions of the Dominion Lands Act and the amendments thereto, to perform the conditions connected therewith, under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of this Act, reside upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent, may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his homestead, or certificate for the issue of such patent, countersigned in the manner prescribed by this Act, and has obtained entry for a second homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by residence upon the first homestead, if the second homestead is in the vicinity of the first homestead.

(4) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon said land.

The term vicinity used above is meant to indicate the same township or an adjoining or cornering township.

A settler who avails himself of the provisions of clauses 2, 3, or 4, must or substitute 20 head of stock with buildings for their accommodation, cultivate 30 acres of his homestead, and have besides 80 acres substantially fenced.

The privilege of a second entry is restricted by law to those settlers only who completed the duties upon their first homestead to this effect: to patent on or before the 2nd June, 1880.

Every homesteader who fails to comply with the requirements of the homestead law is liable to have his entry cancelled, and the land may be again thrown open for entry. Application for patent should be made at the end of three years, before the local agent, sub-agent, or Homestead Inspector. Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands, at Ottawa, of his intention to do so.

Information.—Newly opened immigrants will receive at the Immigration Office, in Winnipeg, or at any Dominion Lands Office, in Manitoba or the Northwest Territories, information as to the lands that are open for entry, and from the office in charge, free of expense, advice and assistance in securing land to suit them. Full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

W. W. CORY,

Deputy Minister of the Interior.

N.B.—In addition to Free Grant Lands to which the regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from railroad and other corporations and private firms in Western Canada.

THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy so far as education and enlightenment goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, subways, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skilful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point; the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore, viewing things from this, the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "Since iron is practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to certain countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Unhindered by the fogs and mists of uncertainty or incompetence she looms up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her dowry is an ample one, nor does she withhold it from those who have the wisdom to know her charms. Her veins are of fine gold. Her iron melts are many and precious. Her will is of iron and as surely her will controls her actions, so surely must her iron control her future. With this iron she will build her railways—the Grand Trunk and the Canadian Northern, albeit in themselves a vast undertaking being but an earnest of future and of still greater enterprise. She must have also bridges, ships, machinery and the thousand and one other necessities which go to build up a large nation—which she will surely one day become. Think of this, to build up a nation! Great is an undependable machine which this iron can ask you to do the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our garden, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we have ready to our hand, and at other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them. We are indisputably throwing away money, but with careful consideration and with due regard to location and the probable measure of success which such location promises.

There are those who would say that the average percentage of iron

mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, decry any form of mining; who, in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in building up his country by studying its natural resources and assisting to develop them?

It almost devolves upon us as a duty, which we owe to our children and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testimonials exacted from us by nature before we will visit a place where stores in trust for future generations. Taking the iron belts on this continent of America we find that within their defined limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our armpit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in military parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch a geographical chart of all the iron districts and lead on the American continent, but the following example will serve to show the high infallibility of mining operations when carried out on the basis above illustrated. We refer to the world famed iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular claim is that of a gentleman who only rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$100.00. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxide exposed on his land were valuable and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$3,000,000. His income from this source alone is \$750,000 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blackmore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposit that the springs come from a stratified ore body below which could be disclosed by borings."

Adding to a proposed expenditure of \$100,000.00 he adds "Having had thirty years experience in locating and working various iron deposits, I have no hesitation in saying that this is a valuable property and one which will justify the expenditure recommended."

The mineral deposits he finds by analysis consists of 43.2 per cent. of metallic iron from which iron ore of the highest quality, not only could be used to produce an excellent paint oxide, for which a market could readily be found, but it could also be used in combination with other ores or smelting and iron and steel manufacture, similar to that so successfully smelted at the Radnor ranges, Quebec province for many years.

Small wonder then that of late this valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

Meals seem too far apart after the gentle, relieving effects of Abbey's Effervescent Salt.

A few Heaters still left. Prices to suit the buyer.

REVILLON BROTHERS, LIMITED.

We Offer \$1,000

For a Disease Germ That Liquezone Can't Kill.

On every bottle of Liquezone we offer \$1,000 for a disease germ that it cannot kill. We do this to assure you that Liquezone does kill germs.

And it is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact which gives Liquezone its worth to humanity; a worth so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights. And we have spent over one million dollars, in one year, to buy the first bottle and give it free to each sick one who would try it.

Acts Like Oxygen.

Liquezone is not made by compounding drugs, nor is there any alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is an absolutely certain germicide. The reason is that germs are vegetables;

and Liquezone—like an excess of oxygen—is deadly to vegetable matter.

Liquezone goes into the stomach, into the bowels and into the blood, to go wherever the blood goes. No germ can escape it and none can resist it. The results are inevitable, for a germ disease must end when the germs are killed. Then Liquezone, acting as a wonderful tonic, quickly restores a condition of perfect health. Diseases which have resisted medicine for years yield at once to Liquezone, and it cures diseases which medicine never cures. Half the people you meet—wherever you are—can tell you of cures that were made by it.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

Asthma, Bronchitis, Hay Fever, Influenza, Kidney Disease, La Grippe, Leucorrhea, Liver Troubles, Measles, Malaria, Rheumatism, Stomach Troubles, Sore Throat, Syphilis, Typhoid, Venereal Diseases, Whooping Cough, Worms, Zoster.

Scars, Erysipelas, Freckles, Glands, Gonorrhea, Hives, Itch, Ringworm, Scabies, Skin Diseases, Tetter, Varicella, Warts, Yaws.

50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our gift, made to convince you; to show you what Liquezone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquezone costs 50c. and \$1.

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Liquezone Company, 159-161 Wabash Ave., Chicago.

My disease is

I have never tried Liquezone, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.

Any physician or hospital not doing Liquezone will be gladly supplied for a test.

—Fl. Saskatchewan Reporter:—Our hockey boys are practicing up for a couple of matches to be played on the Shamrock Rink in the near future against the Bankers hockey team of Edmonton, and the Dominion House Boarders team, of Strathcona.

—It was reported in the city on Saturday that a barn and contents, including a team of horses, was burned on the farm of Mr. Weidner, near Sprucegrove. The tenants of the farm awoke during the night and found the building in flames.

—The prize list of the fat stock shows to be held under the auspices of the Territorial Department of Agriculture has been published. The Calgary show runs from March 15th to 18th and that at Regina from April 4th to 7th. Prizes are offered for shorthorns, herefords, galloways, polled angus and grade cattle; for long wools, medium wools and grade sheep; for purebred and grade swine.

—Red Deer News:—J. C. Brazier, manager of the rink, has arranged to hold a number of skating races for the championship of Alberta, in the rink here on Tuesday, February 21st. The races will include:—Half mile championship. One mile championship. Three mile championship. Novelty race for gentlemen. Novelty race for boys. Boy's half mile, under 16. Couple race, lady and gentleman. Valuable medals, suitably engraved, will be offered as prizes, and all entries must be in by the 18th inst.

—Leduc Enterprise:—The Church of England people in this parish have had the pleasure of a visit from the Bishop of Calgary, whose diocese includes the district of Alberta. His Lordship was the guest of Mr. and Mrs. Geo. A. Liggins during his stay in town, and a reception in his honor was held at their residence on Saturday evening. On Sunday morning Bishop Pinkham held a confirmation service at St. Paul's Church; in the afternoon accompanied the incumbent, Rev. A. D. Floyd to the mission station of Conjurong Creek; and in the evening preached a stirring and effective sermon to a large and attentive congregation.

PERSONAL

W. F. MacNameara, of Watakiwin, was in the city last week.
